Mechanical Drafting Services Inc.
 Drafting & Design for Today's Construction

Residential Home Design

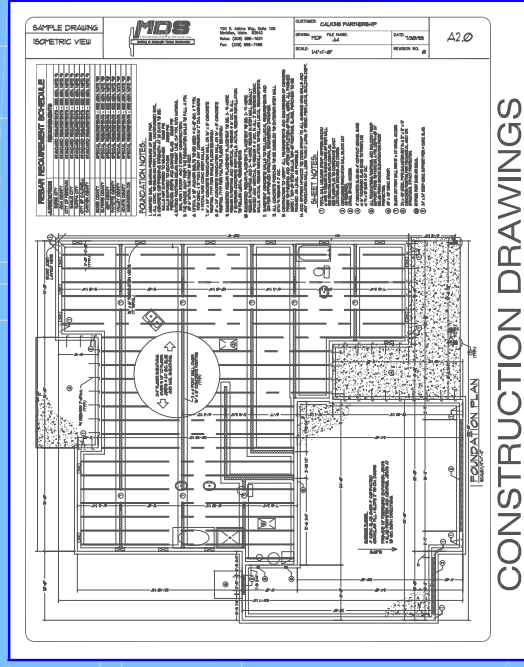

MDS Residential offers full drafting and design services for all residential projects. Whether it is a new home design from scratch or a remodel to a existing home MDS can produce and provide complete construction documents and drawings designed to local codes and customized per your building design.

MDS Residential also offers 3-D modeling for our customers to help visualize their new home design during preliminary design. This allows our customers to virtually walk around the exterior and or the interior of their new home or remodel design to help eliminate communication gaps and getting the customer the finished product they are expecting prior to the development of the construction drawings and or construction of the home or remodel.

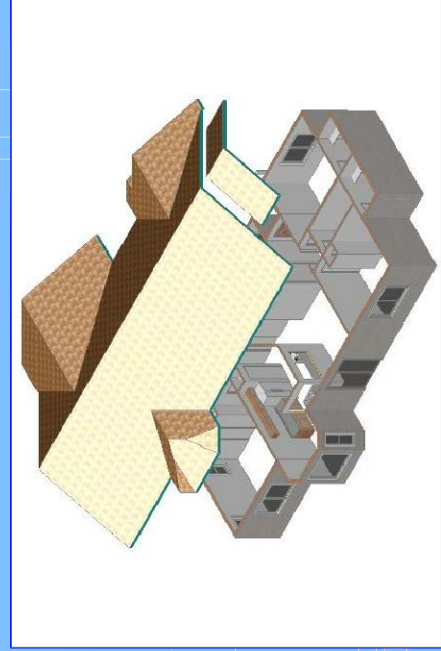

Our goal at MDS is to provide you with a service, which will be considered mandatory for all your future needs.
